

Fog Force™

BIRD REPELLENT

Specimen Label

ACTIVE INGREDIENT:

Methyl Anthranilate (MA),
methyl 2-aminobenzoate40.0%

OTHER INGREDIENTS60.0%

TOTAL100.0%

This product contains 3.3 pounds of Methyl Anthranilate per gallon of product.

EPA EST. No. 071638-OH-001

EPA REG No. 58035-7

KEEP OUT OF REACH OF CHILDREN CAUTION

FIRST AID	
If on skin or clothing	- Take off contaminated clothing. - Rinse skin immediately with plenty of water for 15-20 minutes. - Call a poison control center or doctor for treatment advice.
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.	

Manufactured by: Ceannard, Inc. • PO Box 2404 • Gastonia, NC 28053

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS & DOMESTIC ANIMALS

CAUTION: Avoid contact with skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco.

ENVIRONMENTAL HAZARDS

For terrestrial uses, do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsate. This pesticide is slightly toxic to fish and aquatic invertebrates.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

FOGGING APPLICATIONS

USE RESTRICTIONS: This product may be used indoor and outdoor to repel nuisance birds such as starlings, blackbirds, cowbirds, gulls, Canada geese, mallards, and other birds that have become a nuisance or health hazard in the target area.

Hold the fog generator at least 5 feet from any object, painted surface, and especially plants and shrubbery to avoid discoloration from direct contact with concentrated Rejex-it® Fog Force™ or the heat when using thermal foggers. Do not smoke while applying this product. Minimize direct exposure to humans, pets, domestic animals, or non-target wildlife.

INDOOR FOGGING APPLICATIONS (Warehouses, hangers, garages, assembly plants, etc.)

Apply Rejex-it Fog Force undiluted at a rate not to exceed one (1) ounce per 10,000 cubic feet of space to be treated. Point fog generator in the general direction of the nuisance birds, keeping the fog generator at least 5 feet from any structure or object to allow for complete dissipation of the fog. Expose as many birds as possible to the fog for fast and lasting results. Best product performance is achieved with a dry fog. Consult the fog generator owner's manual for proper settings to assure a dry fog. Both ULV and thermal foggers may be used to apply this product. Several treatments, 1 to 4 days apart may be required for removal of all nuisance birds.

For automated fogging applications, point the fogger in the direction of the birds or their expected approach. Set the fog generator for 10 - 30 second fogging pulses during the time of expected bird activity.

OUTDOOR FOGGING APPLICATIONS:

General Application Directions: Apply Rejex-it Fog Force undiluted at a rate of 6 - 8 ounces per acre (43,500 sq ft) of area to be treated. Point fog generator in the general direction of the nuisance birds, keeping the fog generator at least 5 feet from any structure or object to allow for complete dissipation of the fog. Best product performance is achieved with a dry fog. Consult the fog generator owner's manual for proper settings to assure a dry fog. Both ULV and thermal foggers may be used to apply this product. Several treatments, 1 to 4 days apart may be required for removal of all nuisance birds.

For automated fogging applications, point the fogger in the direction of the birds or their expected approach. Set the fog generator for 10 - 30 second fogging pulses during the time of expected bird activity.

Electrical Substations

Apply Rejex-it Fog Force undiluted using a thermal or mechanical fog generator that will deliver a dry fog with a droplet size within the aerosol size range (below 30 microns). Expose as many birds as possible to the fog for fast and lasting results. Rejex-it Fog Force fog should be applied when birds have settled down or are roosting in the structure and/or wires of the substation. Withhold treatment until conditions favoring successful use arise (temperature, direction, and speed of wind) to be able to cover all the infested structure. For best results, make applications in the evening, when most of the birds have arrived, but before it gets too dark for the birds to leave once exposed to the fog.

Structures and Buildings

Apply Rejex-it Fog Force undiluted using a thermal or mechanical fog generator that will deliver a dry fog with a droplet size within the aerosol size range (below 30 microns) that stay suspended and do not settle to the ground. Expose as many birds as possible to the fog for fast and lasting results. Rejex-it Fog Force fog should be applied when birds have settled down. Withhold treatment until conditions favoring successful use arise (temperature, direction, and speed of wind) to be able to reach all parts of the structure where birds are roosting. For best results, make applications in the evening, when most of the birds have arrived, but before it gets too dark for the birds to leave once exposed to the fog.

Trees and Shrubs

Apply Rejex-it Fog Force undiluted using a thermal or mechanical fog generator that will deliver a dry fog with a droplet size below 20 microns that will penetrate the foliage without wetting it. Expose as many birds as possible to the fog for fast and lasting results. Rejex-it Fog Force fog should be applied when birds have settled down. Withhold treatment until conditions favoring successful use arise (temperature, direction, and speed of wind). For best results, make applications in the evening, when most of the birds have arrived, but before it gets too dark for the birds to leave once exposed to the fog. Application in the morning when the birds normally leave does not have much effect.

Airports and other open areas

Apply Rejex-it Fog Force undiluted using a thermal or mechanical fog generator that will deliver a dry fog with a droplet size within the aerosol size range (below 30 microns) that stay suspended and do not settle to the ground. Set fogger upwind so that the wind will carry the fog in the general direction of the birds. Stop application once the birds have left the area. The best time for application depends on the bird species and the time of year.

Turf (Golf courses, lawns, sports fields, parks, etc.)

Apply Rejex-it Fog Force undiluted using a thermal or mechanical fog generator that will deliver a dry fog with a droplet size within the aerosol size range (below 30 microns) that stay suspended and do not settle to the ground. Set fogger upwind so that the wind will carry the fog in the general direction of the birds. Applications may be done at any time of the day when birds are present. To control Canada geese, apply at any time when they are feeding or roosting, except when they sit on a nest during breeding season.

Lakes and Ponds

Apply Rejex-it Fog Force undiluted using a thermal fog generator that will deliver a dry fog with a droplet size below 20 microns that will stay suspended and does not settle on the water surface. Set fogger upwind so that the wind will carry the fog in the general direction of the birds. Applications should be done as soon as birds arrive.

Harbors and Boat Docks (Not for use in California)

Apply Rejex-it Fog Force undiluted using a thermal fog generator that will deliver a dry fog with a droplet size below 20 microns that will stay suspended and does not settle on the water surface. Set fogger upwind so that the wind will carry the fog in the general direction of the birds. For roosting birds, best applied in the evening when most of the birds have arrived but before it gets too dark for the birds to leave.

Fruit Applications (Cherries, blueberries, and grapes only) (Not for use in California)

Apply Rejex-it Fog Force undiluted using a thermal or mechanical fog generator that will deliver a dry fog with a droplet size within the aerosol size range (below 30 microns). Birds must be exposed to the airborne Rejex-it Fog Force if it is to achieve lasting results.

WARRANTY
