

Specimen Label

TREE GUARD

Deer Repellent

Use on conifers and deciduous, non-fruit-bearing trees, shrubs, flowers and other ornamental plants

Active ingredient:

Denatonium benzoate or Benzyl-diethyl [(2,6 xylyl carbamoyl) methyl] ammonium benzoate	0.2%
Other ingredients	99.8%
Total	100.0%

* Contains 0.017 lbs. (7.76 g) active ingredient (also known as Bitrex) per gallon.

Net contents: 1 Gallon

Keep out of reach of children.

Directions for use: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Use restrictions: This product may be used to discourage deer (*Odocoileus* spp.) from feeding on shrubs, ornamental plants, conifers, and nonbearing deciduous trees. Use this product only at ambient temperatures between 40F and 90F. Where deer pressure is high, consider other abatement options including fencing. Do not use on food or feed crops. Do not apply aerially. Do not apply product through any type of irrigation system or hose proportioner applicator. Do not apply directly to or where product might drift onto stone, concrete or siding as staining might occur. TREE GUARD has been tested on many species of ornamental plants and is believed not to be generally phytotoxic. Nevertheless, it is advisable to test the product on types of plants that might be especially sensitive by treating and observing small portions of the plant before treating the entire plant.

Application directions: This product is ready-to-use and should not be diluted. Shake container well before using product. Apply TREE GUARD directly using the squeeze trigger applicator. If the container lacks a squeeze trigger, transfer product to any pump-type sprayer equipped with a cone or flat fan nozzle. Adjust nozzle to obtain even coverage. Apply only to dry plants. Hold spray tip 1 to 2 feet from plants to be treated and spray leaves, needles, buds, branches and trunks subject to browsing by deer. Thoroughly wet treated surfaces but do not apply to the point of significant spray run-off. For small shrubs such as global arborvitae 20-24" high, approximately 4-5 plants can be treated with the contents of a 1-quart container. Less product per plant will be needed for treating smaller, or less densely foliated plants; larger, heavily foliated plants will require greater amounts of product. Repeat treatments if deer damage resumes. For best results, apply to bare branches in fall, after the first frost, and to unprotected foliage in spring. Clean application equipment immediately before spray dries.

Precautionary statements: hazards to humans and domestic animals. caution: Harmful if absorbed through the skin. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling.

First aid

Have label with you when obtaining treatment advice.

If on skin or clothing. Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 min. Call a poison control center or doctor for treatment advice.

Environmental hazards: Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not clean equipment or dispose of equipment wash waters in a manner that will contaminate water resources or arable land.

Storage and disposal:

Keep from freezing

Storage: Store only in original container, in a dry place inaccessible to children and pets at temperatures above freezing.

Product Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Do not reuse empty container. Rinse thoroughly and wrap in several layers of newspaper before discarding in trash.
